ABOUT AUREUS ENERGY

Serving the Peace Region since 2011 Building a reputation for top-quality service.

Aureus Energy Services Inc. was founded in early 2011 with our first equipment hitting the field later that year. Aureus was created with a goal of becoming a top-quality service provider in the heating and fluid handling business. We take pride in a safe and efficient operation and continue to build our company with many repeat customers, while always welcoming new business.

2015

Aureus Energy Services Inc. now offers brand new fluid heating technology and a complete line of fluid management services with high caliber staff. No job is too big or too small. Aureus is overcoming current economic challenges with safety, new technology, diversification, and efficiency.

2014

Tank trucks were added to the service line. Jason Tocheniuk and James Gaudet also completed the management buyout of one of the original partners, continuing to steer the company toward a growth strategy based on a reputation for maximum utilization and high-quality service. Aureus also moved into our new 14,250-square-foot Grande Prairie shop.

2013

High-pressure pumping and hot oiling equipment were introduced to our fleet, adding two fully-commissioned hot oilers for field use. This upgrade allowed us to offer pressure ratings from 34.5 MPa to 103.4 MPa.

2012

Our fleet expanded from just two trucks to five trucks within our first year of operations, adding our 24 MMBTU and 35 MMBTU super heaters.

New Grande Prairie Shop

Over 14,000 square-feet to serve you better.

Our new 14,250-square-foot facility is situated on 3.25 acres in the Mcrae Industrial Park. This state-of-the-art facility enables us to clean and maintain our fleet to the highest levels. It is equipped with a fully functional wash bay with two wash wands, five drive-through bays, and is prepped for overhead cranes. Onsite fuel storage assists with quicker and more efficient dispatching. Our fully fenced and secured yard is necessary to accommodate our growth and provide a safe working environment for our staff.

We're Here to Stay

The 2,500-square-foot office is fully equipped to serve Aureus' growing needs. We maintain a comfortable and appealing work environment in the office to ensure efficient and friendly administrative and HSE work. Aureus is committed to becoming a long-term oilfield service provider in Alberta and northeast British Columbia for many years to come.

Dedicated to Safety

Safety, along with environmental responsibility, is in the spotlight. Add that to other business considerations—efficiency and cost-effectiveness—and there's suddenly a lot to think about.

We offer a sincere commitment to safety and efficiency. We endeavor to protect the environment. Your communities are our communities, and together we can practice diligence in the preservation of the environment while protecting your bottom line.

Health & Safety Program Details

The Aureus Energy Services Health & Safety Program is influenced by Industry Recommended Practice Vol. 9 (IRP 9) – Basic Safety Program, which is governed by Enform. At all times, we are focused on reaching the highest standards in the industry, especially within our own Health & Safety Program.

Certifications, Programs & Subscriptions

- Alberta Certificate of Recognition
- BC Certificate of Recognition
- Extensive HSE Program
- Subscription to ComplyWorks
- Subscription to ISNetwork

Aureus Energy Services is proud to be a subscriber to both ComplyWorks and ISNetwork. Both services aim to meet an ever-increasing need for due diligence, measurement, and communication between vendors and their clients.

- 16 MMBTU twin burners
- High-end hydro and pumping package is extremely reliable
- Diesel fuel, slop/methanol tank on board
- Sleepers, fully-equipped cabs
- Geotrac safety tracking system
- Backup hose, fittings, and tools for in-the-field problem solving
- Separate hydrocarbon hose package equipped with line pipe, high-end discharge hoses
- Fully equipped support vehicles

NATURAL GAS & LPG HEATERS

NEW Skid mounted 35 MMBTU NG and LPG heaters

- Trailer mounted 35 MMBTU NG and LPG heaters
- Safely and efficiently runs either LPG or NG
- Ability to switch between NG (pipeline, CNG or LNG) to LPG in seconds
- Safety features unseen in most heating equipment allow us to meet or exceed any Canadian standards
- Unparalleled reliability in the field with equipment design
- Sleepers and fully equipped cabs
- Geotrac safety tracking system
- Backup hose, fittings, and tools for in-the-field problem solving
- Speed-loading tank trucks

DIESEL HEATERS

The Aureus 24 MMBTU is one of our most popular trucks, and we have another under construction for fall 2015.

- Newer Western Star Chassis – 75% road restrictions
- One of the most efficient burners in the field
- High-end hydro and pumping package is extremely reliable
- Sleepers and fully equipped cabs
- Geotrac safety tracking system
- Backup hose, fittings, and tools for in-the-field problem solving
- Fully equipped support vehicles

MAINTENANCE PROGRAM - We Don't Tolerate Downtime

Our maintenance program is geared toward keeping our fleet in service 24/7, 365 days a year. We know that prevention is the backbone of constant uptime and our program emphasizes regular preventative maintenance.

All of our operators adhere to our strict pre-trip and post-trip inspection procedures based on federal and provincial transportation regulations. We carry out all regular maintenance within or in excess of manufacturers' recommended maintenance intervals. We do our job by the book and we don't cut corners.

We know how expensive downtime is in the field, and we spend three times what our competitors do on maintenance to make sure that our gear is always working for our customers. By utilizing a variety of licensed service partners we can ensure quick turnaround on all service needs.

This focus on maintenance is what prompted Aureus to take on our new facility in Mcrae, with 3.25 acres, overhead cranes, wash bay, and service bay—ensuring an operational facility that keeps our units in the field.
